

Understanding and Implementing Energy Management Systems (including ISO 50001 and BS EN 16001)

Master the fundamentals of Energy Management Systems in just 1 Day!

Course Description

That energy is essential is a given, without it no organisation would be in business. All businesses manage energy to some extent, even if only to ensure its availability!

Globalisation of business, whilst providing significant benefits to organisations, has also brought new risks and challenges. Consumer pressure, energy code legislation, NGO scrutiny and the media, amongst others, are all placing your business under the spotlight in terms of your management of social, CSR, and carbon footprinting issues.

Your decisions related to energy management and opportunities will depend on how significant the cost and environmental effects of energy are to business operations, broader business strategy and positioning considerations and, for some, new market opportunities.

Quotes from participants attending the previous event

“ I have never thought about that the course could be so enjoyable!”

“ The course was packed with very relevant activities and practical hands on exercise.”

“ I particularly enjoyed the time during the team building activity, it was so much fun and full of challenge.”

Understanding and Implementing Energy Management Systems (including ISO 50001 and BS EN 16001)

Benefits to Your Business

The objective of this course will be encouraging the construction of an effective Energy management system (ISO 50001 / BS 16001) for your organisation, under the expert tutelage and guidance of a leading energy consultant. Take the knowledge and skills imparted during this course and use them to improve and protect your business.

About the Tutor

Mr John A. Herbert is the Panel Chair (Innovation and Framework/BEAM Faculty) of the BEAM Society and a member of the Association of Energy Engineers (USA), and Hong Kong Association of Energy Engineers, and vice-chairman of the Hong Kong Association of Energy Services Companies. He is an internationally recognised expert in the field and has nearly thirty years experience working in the buildings and manufacturing sectors, and has conducted energy assessments and energy audits in the region. John is an excellent trainer who adopts an interactive approach in training.
